

Caskets

Caskets vary from coffins primarily in their shape: they are often rectangular rather than shaped tapering to the head and foot following the contours of the body. Some caskets are imported from North America and are usually constructed in timber and have a mattress bed within and a hinged lid. Caskets can also be constructed in metal. The cost of any casket will be confirmed at the time of enquiry as they can fluctuate.

Simple Oak Casket, constructed in England (not illustrated): From £1,050.00

Imported casket with hinged lid and mattress bed (as shown). Prices start from £1,990.00
